

| No | Bug/Error/Feature/Improvement | Title | Enviroment |
|--|-------------------------------|---|---|
| Errors/Warnings in DevTools Console | | | |
| 1 | Error | When opening the page under test the error message appears in DevTools Console -> Failed to load resource: the server responded with a status of 403 () -> GET https://d3cy3u1txmkqs3.cloudfront.net/rosetta net::ERR_ABORTED 403 | Windows 10 Chrome 107 |
| Cross browser testing | | | |
| 2 | Bug | When opening the page under test in Chrome and Firefox it opens in the user's language (for me it is in Russian), in Edge the page opens in English despite the fact that the browser was adjusted to detect the user's language and location | Windows 10 Chrome 107 Edge 107 Firefox 107 |
| Page performance testing | | | |
| 3 | Bug | Testing with PageSpeed Insights tool showed poor performance of the page for mobile devices and PCs | Windows 10 Chrome 107 |
| New Ecwid account creation -> Validation of "Your full name" field | | | |
| 4 | Bug/Improvement | There is no information message about input data rules/restrictions (min/max number of characters, characters type, language, letter case, etc.) | Windows 10 Chrome 107 |
| 5 | Bug/Improvement | There is no asterisk/information message about the obligatory filling of "Your full name" field | |
| 6 | Bug | The corresponding validation message about the max allowed number of characters in "Your full name" field appears only for names that contain more than 255 characters | |
| 7 | Bug | Entering of names that contain even 1 character is allowed, the corresponding validation message about the min allowed number of characters in "Your full name" field doesn't appear | |
| 8 | Bug/Feature | Entering of names in different languages is allowed, the corresponding validation message about the proper language for entering doesn't appear in "Your full name" field | |
| 9 | Bug | Entering of numbers in "Your full name" field is allowed, the corresponding validation message about restriction of using numbers in "Your full name" field doesn't appear | |
| 10 | Bug | Entering of special characters in "Your full name" field is allowed, the corresponding validation message about restriction of using special characters in "Your full name" field doesn't appear | |
| 11 | Bug | Entering of Non-ASCII characters (e.g. emoji like ♣️🙈♂️) in "Your full name" field is allowed, the corresponding validation message about restriction of using Non-ASCII characters in "Your full name" field doesn't appear | |
| 12 | Bug | Entering of a combination of Cyrillic & Latin letters, numbers and special characters in "Your full name" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |

| | | | |
|--|-----------------|---|--------------------------|
| 13 | Bug | Entering of a combination of Cyrillic & Latin letters, numbers, special characters and several spaces in "Your full name" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 14 | Bug | Entering of a XSS injection in "Your full name" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 15 | Bug | Entering of a SQL injection in "Your full name" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 16 | Bug | Entering of a HTML injection in "Your full name" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| New Ecwid account creation -> Validation of "Email" field | | | |
| 17 | Bug/Improvement | There is no information message about input data rules/restrictions (min/max number of characters in the user name part and the domain name part of Email, characters type, language, letter case, etc.) | Windows 10 Chrome 107 |
| 18 | Bug/Improvement | There is no asterisk/information message about the obligatory filling of "Email" field | |
| 19 | Bug | Entering of more than 64 characters in the user name part of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 20 | Bug | Entering of an incorrect first level domain name (more than 6 characters) is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 21 | Bug/Feature | Entering of Cyrillic letters in the user name part of Email is allowed | |
| 22 | Bug/Feature | Entering of Cyrillic letters in the domain name part of Email is allowed | |
| 23 | Bug | Email consisting of Cyrillic and Latin letters mixed is allowed (ex.: мяхйrf@gtц.fr), the corresponding validation message about input data rules/restrictions doesn't appear | |
| 24 | Bug | Entering of a space(s) as the first character of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 25 | Bug | Entering of a space at the end of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 26 | Bug | Email with two dots in a row in the user name part of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 27 | Bug/Feature | Automatic trimming of spaces at the beginning of Email | |
| 28 | Bug/Feature | Automatic trimming of spaces at the end of Email | |
| 29 | Improvement | There is only Email option for registering but no any alternative (mobile, login, etc.) | |
| New Ecwid account creation -> Validation of "Password" field | | | |
| 30 | Bug/Improvement | There is no information message about input data rules/restrictions (min/max number of characters, characters type, language, letter case, etc.) | |
| 31 | Bug/Improvement | There is no asterisk/information message about the obligatory filling of "Password" field | |

| | | | |
|--|-----------------|--|---|
| 32 | Bug | Entering of an endless password is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | Windows 10 Chrome 107 Edge 107 Firefox 107 |
| 33 | Bug | Entering of Cyrillic letters in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 34 | Bug | Entering of Non-ASCII characters (e.g. emoji like ♣️🙈) in "Password" field is allowed, the corresponding validation message about restriction of using Non-ASCII characters in "Password" field doesn't appear | |
| 35 | Bug | Entering of a XSS injection in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 36 | Bug | Entering of a SQL injection in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 37 | Bug | Entering of a HTML injection in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 38 | Bug | The password field cannot be set to be visible in Chrome and Firefox, but at the same time this function works properly in Edge | |
| 39 | Bug | The password visibility function disappears in Edge in the case when you start entering a password, then you go to another input field (ex.: "Email"), and then you return to "Password" field to continue entering it | |
| 40 | Improvement | There is no validation on password complexity (even the simplest passwords that are easy to crack are allowed) | |
| 41 | Improvement | No "Confirm the password" field | |
| 42 | Improvement | The inability to generate a password automatically | |
| Account authorization -> Validation of "Email" field | | | |
| 43 | Bug/Improvement | There is no information message about input data rules/restrictions (min/max number of characters, characters type, language, letter case, etc.) | Windows 10 Chrome 107 |
| 44 | Bug | Entering of more than 64 characters in the user name part of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 45 | Bug | Entering of an incorrect first level domain name (more than 6 characters) is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 46 | Bug/Feature | Entering of Cyrillic letters in the user name part of Email is allowed | |
| 47 | Bug/Feature | Entering of Cyrillic letters in the domain name part of Email is allowed | |
| 48 | Bug | Email consisting of Cyrillic and Latin letters mixed is allowed (ex.: мяхйrf@gtц.fr), the corresponding validation message about input data rules/restrictions doesn't appear | |
| 49 | Bug | Entering of a space(s) as the first character of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |

| | | | |
|--|-----------------|---|--------------------------|
| 50 | Bug | Entering of a space at the end of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 51 | Bug | Email with two dots in a row in the user name part of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 52 | Bug/Feature | Automatic trimming of spaces at the beginning of Email | |
| 53 | Bug/Feature | Automatic trimming of spaces at the end of Email | |
| 54 | Improvement | There is only Email option for authorization but no any alternative (mobile, login, etc.) | |
| Account authorization -> Validation of "Password" field | | | |
| 55 | Bug/Improvement | There is no information message about input data rules/restrictions (min/max number of characters, characters type, language, letter case, etc.) | Windows 10 Chrome 107 |
| 56 | Bug | Entering of an endless password is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 57 | Bug/Feature | Entering of a password that contain even 1 character is allowed, the corresponding validation message about the min allowed number of characters in "Password" field doesn't appear | |
| 58 | Bug/Feature | Entering of Cyrillic letters in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 59 | Bug | Entering of a XSS injection in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 60 | Bug | Entering of a SQL injection in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 61 | Bug | Entering of a HTML injection in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 62 | Bug | The password field cannot be set to be visible in Chrome and Firefox, but at the same time this function works properly in Edge | |
| 63 | Bug | The password visibility function disappears in Edge in the case when you start entering a password, then you go to another input field (ex.: "Email"), and then you return to "Password" field to continue entering it | |
| 64 | Improvement | After repeatedly entering an incorrect password there is still nothing blocking the possibility of further entering the password | |
| Account authorization -> Validation of "Keep me signed in" checkbox function | | | |
| 65 | Bug | "Keep me signed in" checkbox function works incorrect (it is always on): user is logged in succesfully with "Keep me signed in" checkbox off, but after closing the browser and reopening the page user gets to his account without authorization needed (although he should be logged out) | Windows 10 Chrome 107 |
| Password reset -> Validation of "Email" field | | | |

| | | | |
|--|-----------------|---|---|
| 66 | Bug/Improvement | There is no information message about input data rules/restrictions (min/max number of characters, characters type, language, letter case, etc.) | Windows 10 Chrome 107 |
| 67 | Bug | Entering of more than 64 characters in the user name part of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 68 | Bug | Entering of an incorrect first level domain name (more than 6 characters) is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 69 | Bug/Feature | Entering of Cyrillic letters in the user name part of Email is allowed | |
| 70 | Bug/Feature | Entering of Cyrillic letters in the domain name part of Email is allowed | |
| 71 | Bug | Email consisting of Cyrillic and Latin letters mixed is allowed (ex.: мяхйrf@gtц.fr), the corresponding validation message about input data rules/restrictions doesn't appear | |
| 72 | Bug | Entering of a space(s) as the first character of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 73 | Bug | Entering of a space at the end of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 74 | Bug | Email with two dots in a row in the user name part of Email is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 75 | Bug/Feature | Automatic trimming of spaces at the beginning of Email | |
| 76 | Bug/Feature | Automatic trimming of spaces at the end of Email | |
| Changing user password -> Validation of "Password" field | | | |
| 77 | Bug/Improvement | There is no information message about input data rules/restrictions (min/max number of characters, characters type, language, letter case, etc.) | Windows 10 Chrome 107 Edge 107 Firefox 107 |
| 78 | Bug | Entering of an endless password is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 79 | Bug | Entering of Cyrillic letters in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 80 | Bug | Entering of Non-ASCII characters (e.g. emoji like ♣️☺️♂️) in "Password" field is allowed, the corresponding validation message about restriction of using Non-ASCII characters in "Password" field doesn't appear | |
| 81 | Bug | Entering of a XSS injection in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 82 | Bug | Entering of a SQL injection in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 83 | Bug | Entering of a HTML injection in "Password" field is allowed, the corresponding validation message about input data rules/restrictions doesn't appear | |
| 84 | Bug | The password field cannot be set to be visible in Chrome and Firefox, but at the same time this function works properly in Edge | |

| | | | |
|---------------|-------------|--|---|
| 85 | Bug | It is possible to change the password to the same one that was before | |
| 86 | Bug/Feature | After changing the password there is an automatic redirect to the user Ecwid store account | |
| 87 | Improvement | There is no validation on password complexity (even the simplest passwords that are easy to crack are allowed) | |
| 88 | Improvement | No "Confirm the password" field | |
| 89 | Improvement | The inability to generate a password automatically | |
| UX/UI testing | | | |
| 90 | Bug | When you click on the "Terms of Service" link after entering your registration/authorization data in the corresponding fields the link opens in the same window (and not in a new one) and when you return back on the previous page all entered data disappears | Windows 10 Chrome 107 Edge 107 Firefox 107 |
| 91 | Bug | When you click on the "Privacy Policy" link after entering your registration/authorization data in the corresponding fields the link opens in the same window (and not in a new one) and when you return back on the previous page all entered data disappears | |
| 92 | Bug | Links "Terms of Service" and "Privacy Policy" are different for Edge in comparison with Chrome and Firefox | |
| 93 | Improvement | The "Keep me signed in" checkbox should be placed before the login button for easy navigation by the Tab key | |
| 94 | Improvement | The Tab key for navigation through input fields works properly but it is not visually clear where the focus has moved | |
